SKILLS

React
Redux
Redux Toolkit
Middleware
(Redux Saga && Redux Thunk)
JavaScript
TypeScript
HTML
CSS
SASS
SCSS
Next js
Unit Testing

HOBBIES

Writing Poems
Watching Movie
Meditation

EDUCATION

Bachelor of Engineering in KBNCE, Kalaburgi
2009- 2014

WORK EXPERIENCE

Freelancer (Simplify Healthcare, Zensar)
July 2024 – Current

- Enhanced user experience by implementing responsive web designs and optimizing application performance.
- Developed reusable components to facilitate faster development timelines and improve overall code quality.
- Maintained high-level expertise in React state management strategies.
- Contributed to a positive UX through careful attention to design specifications and close collaboration with UI/UX designers.
- Converting the Figma design into React Reusable components
- Working with Regression team and fixing the hot bugs
- Deploying the applications via Jenkins or GitLab.
- Writing the Unit Test cases and ensuring code coverage to 85%
- Using GitHub copilot and Codium AI tools.
- Fixing security vulnerabilities and SonarQube errors.
- Mentoring the Junior Team members

Accenture Custom Engineering Specialist
April 2019 – June 2024

 Projects :
- In AT&T support pages, Best Buy Credit card payment system, Intel Material Management System using React js , Javascirpt and Typescript.
- **SmartHomeManager** Web Application where Home Networks , Connected devices, Routers, Basic and Advance Security Systems of AT&T Internet will be managed using this Application using React , Typerscript , HTML and CSS(SCSS) and Java.

Responsibilities
- Acted as team leader for team size of 5 in group projects, delegating tasks and providing feedback and achieved 100% no surprise deliverables.
- Led team of 5 UI developers, achieving 50% reduction in project delivery time through streamlined processes and effective task allocation.
- Collaborated with designers, backend developers, and stakeholders to translate concepts into 4 feature-rich applications.
- Spearheaded implementation of Redux for state management, optimizing data flow and maintaining consistent user experiences across 4 applications.
- Architected 100+ reusable UI components, reducing redundant code by 70% and accelerating development cycles.
- Integrated RESTful APIs, enhancing real-time capabilities and contributing to 100% improvement in application responsiveness.
- Conducted 4 code reviews per month, mentoring team members and achieving 90% increase in code quality.
- Championed performance optimization initiatives, resulting in 90% faster rendering times and 70% decrease in page load times. .

- Following Test Driven Development practices. Writing unit tests using Jasmine and Enzyme and helping define overall testing strategy to achieve 80% code coverage.
- Collaborated with Product Managers in 50+ sprint planning sessions, ensuring 100% alignment with business goals.
- Mentored and guided employees to foster proper completion of assigned duties.

Linkeddots Engineering Solutions Private Limited
Sr. Software Engineer
January 2018 – March 2019

Projects: i3m connected dots :
for Tata Steel , IIOT Dash board for Man Machine and Material tracking using React Class Components , Building Java Rest services , and Integration with Java Rest Services.

Responsibilities

- Developed and maintained 100+ user interfaces for web applications, consistently meeting project deadlines and receiving 100% positive feedback from stakeholders.
- Implemented responsive designs and mobile-first strategies, resulting in 100% improvement in user engagement across various devices.
- Integrated 10+ third-party libraries and APIs, enhancing application functionality and achieving 100% reduction in development time.
- Assisted in user testing and debugging, resolving 2+ front-end issues on average per week and delivering polished products.
- Contributed to 50+ team discussions on process improvements and technical strategies, resulting in 40% more efficient development workflows.
- Worked as Fullstack developer Creating both React Components and creating Java JPA Rest API.

Infotel India Pvt Ltd
Front End Developer
July 2014 – January 2018

- **Projects:** For monitoring Production line in manufacturing company, calculating downtime, productivity of plant size with 3000 acre and 1000000 employees, 300+ production lines etc. using HTML CSS, React Js Bootstrap and Redux

Responsibilities:
- Developed IIOT Dashboard from scratch. This Dashboard will show real time Man Machine and Material data. from 3000 acres steel plant along with User management to perform workforce analysis.
- Translated 10+ design concepts into interactive prototypes and user interfaces, consistently meeting or exceeding project milestones by 100%.
- Collaborated closely with UX designers to iterate on design mockups and ensure 100% feasibility of implementation.
- Created 20+ custom animations and transitions, leading to 100% increase in user engagement and visual appeal.
- Worked closely with backend developers to seamlessly integrate 100+ front-end components with server-side logic.
- Regularly communicated progress and potential roadblocks through 1 daily stand-up meetings and sprint planning session.
